Frames AR T2 palletstellingen - XL

FRAME XL

DESCRIPTION	A vertical structure consisting of 2 uprights, joined by a system of bracing profiles, and base plates intended to support the storage levels.		
DIMENSIONS AND COMPONENTS	An XL frame consists of two XL uprights and their corresponding bracing profiles, upright base plates and fixing elements (bolts, nuts and bushings).		
DESIGNATION	FRAME [UPRIGHT MODEL]/[DEPTH]/[HEIGHT]/[FINISH]		
MATERIAL	UPRIGHT MODEL	XL1, XL2	
	TYPE OF BASEPLATE 2 alternatives:	S	Base plate BS01/100/AZAR. See product datasheet FT-001025. · AZAR finish for pregalvanised uprights · Same finish as for XL upright in other cases
		0	No upright base plate
	DEPTH	Bt : Distance between Upright Face Widths Diagonal bracing (D600) is made using C4025 profiles with M1020 perforation. See datasheet FT-004087	
	HEIGHT	L : Length of Upright XL	
	FINISH	Based on finish of Upright XL	

GENERAL DIMENSIONS OF UPRIGHT XL	
FRAME DIMENSIONS BASED ON THE UPRIGHT BASE PLATE USED	
No base plate: 0	Base plate BS01/100/AZAR: S
	
	

Bracing consists of C40x25 horizontal and diagonal profiles whose length, based on the depth of the XL frame, is shown in the following table:

FRAME DEPTH B_t (mm)	LENGTH OF HORIZONTAL L_h (mm)	LENGTH OF DIAGONAL L_d (mm)	
600	470	778	 
700	570	841	
800	670	910	
900	770	985	
1000	870	1064	
1100	970	1147	
1200	1070	1232	
1300	1170	1319	

To calculate the length of horizontal and diagonal profiles of frames, the following equation can be used:

Length of horizontal profile: $L_h = L_{horizontal} = B_t - 130$	Length of diagonal profile: $L_d = L_{diagonal} = \sqrt{(L_h - 40)^2 + (600)^2} + 40$
---	--

FRAME ASSEMBLY: D600 diagonal bracing of horizontal and diagonal profiles. Dimensions to centrelines of axes

The first horizontal profile is placed 160 mm from the base plate and then diagonal profiles are placed in 600 mm pitch, with a final horizontal profile. If the distance of the last horizontal profile at the end of the upright is equal to or greater than 440, another horizontal profile will be placed at a minimum distance of 300 mm. The following figures show the different configurations depending on the frame height.

Please note the torque of C3015 profiles in order to avoid deformations during assembly (see ASSEMBLY INSTRUCTIONS).

ASSEMBLY INSTRUCTIONS

COMPONENTS AND QUANTITIES		
MARK	ELEMENT	
1	UPRIGHT XL	
2	PROFILE 4025 Length Lh	
3	SPACER CAD11/25/Z	
4	PROFILE 4025 Length Ld	
5	BOLT BO-M10X70/D912/8.8/Z000	
6	NUT NU-M10/D985/8/Z000	

There are 2 alternatives for setting up the frame depending on the base plate used:

BASE PLATE S	Joined to upright using:		
	QUANTITY	DESIGNATION	
	4	BOLT BO-M8X20/D933/8.8/Z000	
	4	NUT NU-M8/D985/8/Z000	
NO BASE PLATE
